

We specialize in helping children, adolescents and adults who are experiencing:

- ♥ Feelings of sadness and depression
- ♥ Thoughts of self-harm or harming others
- ♥ Involvement in fights
- ♥ Out-of-control behaviors
- ♥ Struggles with traumatic experiences
- ♥ Intense worries and fears
- ♥ Difficulty concentrating
- ♥ Alcohol, substance abuse and associated mental health disorders

KVC Kentucky is different from other mental health centers in that we provide services in the child's home or at school, rather than requiring children and families to come to an office.

We are dedicated to providing effective services and achieving the best outcomes possible for the children that we serve. We offer our staff over 250 hours of training yearly and value the continuity of care that we are able to provide through our variety of services.

KVC Mission

To enrich and enhance the quality of life for individuals, families and communities by providing comprehensive and compassionate medical and behavioral healthcare, social services and education.

In-Home Behavioral Health Services

Innovative, compassionate and trauma-informed

KVC's Impact

At KVC Kentucky, we have built our reputation on the highly effective in-home Behavioral Health Services we have provided for over 15 years. Last year, KVC served nearly 10,000 children and families across Kentucky!

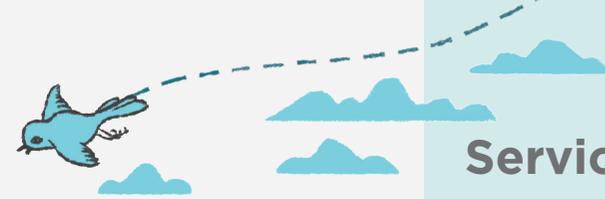

KVC serves over 59 counties in Central and Eastern Kentucky. While we have 8 offices across the state, we are an in-home service provider.

Dr. Marc Crusier

Our on-site, board-certified, child psychiatrist.

Services Provided

- **Psychosocial Assessment-** Our master's level clinicians are highly trained in comprehensive assessment techniques in order to develop an accurate analysis of a child's presenting problems.
- **Psychotherapy-** Our therapists work with the service team to identify specific evidence based interventions and can provide therapy at a frequency, schedule and location based on the needs of the child.
- **Collateral Therapy-** KVC therapists work with parents, family members, primary care physicians and community partners to meet the needs of the child.
- **Case Management-** KVC case managers work diligently and quickly to find the proper care and to provide community-based services that focus on the needs of the child and family.
- **Comprehensive Community Support -** Our community support associates work with the wraparound team to provide targeted, strength-based skill building in the home and community as directed by the therapist and outlined in the client's treatment plan.
- **Substance Abuse Treatment-** Services for children and adolescents struggling with alcohol and other drug abuse. This program is funded by KY Kids Recovery, utilizing our successful in-home model.
- **On-site Staff Psychiatrist-** Our psychiatrist is available to meet with clients as needed.

Wraparound Care Plan

We utilize a service team approach to develop a collaborative care plan that is designed to help children live successfully at home and in the community. Team members meet frequently to assess progress, develop goals and interventions, and put crucial support systems in place.

"We've always been the largest in-home provider in Kentucky, achieving a 93% success rate of keeping kids in homes. Our approach is making a difference in people's lives."

*Elizabeth Croney
President, KVC Kentucky*

What do In-Home Services mean for me?

It means that we can conveniently and effectively provide help for you in your home.

- No travel time or sitting in waiting rooms.
- Your therapist can better understand the opportunities and barriers that you face in your everyday environment.
